#### Description:

Splits Training is designed for all levels to get full splits step by step, even if you are a beginner. The mixing of static and dynamic splits helps you improve flexibility effectively and achieve results faster than you think. With about 10 min a day, you'll get closer and closer to the floor! Productive stretches for splits in 30 days are suitable for men and women, adults and kids. You can customize your splits training based on your own preferences, no equipment needed. Whether you want to do a full split for dance, ballet, gymnastics or martial arts, this training will help you get there. Why splits? Splits have been proven to prevent injuries, increase muscle strength, relieve muscle stiffness and give you better circulation. Improve your flexibility & balance Flexibility & balance are body muscles to increase your range of motion. Loosen your hip flexors Due to sitting at a desk all day, most people have extremely tight hip flexors, which can cause pain, especially in your lower back. Splits open up these areas to relieve your muscle tension. Deeply stretch your legs When doing splits, your legs will be stretching the whole time. Doctors will recommend splits as part of your exercise routine, especially if you're doing activities such as running or biking. Boost your circulation Splits lengthen your muscles and improve your circulation by increasing blood flow to your muscles. Please get your muscles warmed up before doing the splits. Splits need time; your muscles need time to stretch, recover and adapt to the new demands. Be patient, and stick to it; you'll soon see progress.
